T: 050-425-6146

Career Objectives

A programmer and full-stack web developer that makes responsive, user-friendly websites. I enjoy programming in any language and I always learn new things. I also like electrical work and embedded systems.

Education

- High School Certificate
  Vision Private School (99.2%) – 2023
- BSc in Computer Engineering:
  Khalifa University – 2023-2027 (expected)
- Vue.js LinkedIn Course Certificate
  LinkedIn Learning – June, 2025
- Tailwind CSS LinkedIn Course Certificate
  LinkedIn Learning – July, 2025

Experiences

- Programmed a campus management system (full-stack) in a group of 4 (Dec, 2025)
  - Used Vue.js, and Spring Boot for the frontend and backend.
- Managed a bottle distribution booth (Spring, 2024)
  - I covered a community service shift for university bottle distribution for at 3 hours.

Skills

- Programming & Web Development
  - Languages: Python, Java, C++ (intermediate)
  - Frontend: Vue.js, Tailwind CSS (advanced)
  - Backend: Spring Boot (intermediate)
  - Version Control (Git) (proficient)

Achievements

- Built my portfolio website (February, 2026)
- Developed an AI-based Campus Management System (October-Decemeber, 2025)
    - Used an LLM to help the user navigate the application.
- Created a Tic-tac-toe Discord Bot (July, 2025)
    - Wrote an algorithm in Python to make the bot never lose.
- Won 2nd place in university's e-gaming competition (Summer, 2024)
    - Built a sustainability-themed web game using Phaser.js.

Interests

- Full-stack Web Development
- Website and Web App design
- Embedded Systems & Electrical Work
- 3D Printing Design
